

Please e-mail this form with supporting documents to csgrad@gmu.edu.

Students in the Computing Foundation Graduate Certificate can request the substitution of course requirements on a case-by-case basis, depending on prior undergraduate preparation. Use this form only if you have learned equivalent material in a college course and received an adequate grade.

- If your request is approved, you will be eligible to substitute or waive the requirement depending on your student status and program goals.
• If your request is denied, you will need to fulfill the original requirement.
• Attach an unofficial copy of your transcript. For each course listed in the table below, include a syllabus with a detailed schedule of topics and textbook used. A decision will not be made without these materials.
• This form must be submitted before the first day of classes in your first semester.

Last Name, First Name
